

EDUCATION

Ph.D. in Biostatistics

Thesis: Methods for Time Series Network Analyses
Advised by Dr. Ali Shojaie

UNIVERSITY OF WASHINGTON

Seattle, WA

Sep 2020 - Aug 2025

I am interested in developing and applying advanced statistical and deep learning methods to analyze and complex data, with a focus on network data, in medical applications.

Research interests: Statistical Machine Learning, Explainable AI, Time Series Network Analyses, High-Dimensional Statistics

Coursework: Statistical Learning, Advanced Statistical Learning, Nonparametric Statistics, Advanced Regression Methods, Computational Molecular Biology

M.A. in Statistics

UNIVERSITY OF WASHINGTON

Seattle, WA

Jun 2018 - Aug 2020

B.A. in Economics

Honors Thesis: Fatal attraction: health care agglomeration and its consequences
Advised by Dr. Stephen Sheppard

WILLIAMS COLLEGE

Williamstown, MA

Sep 2011 - Jun 2015

SKILLS

Python (advanced), PyTorch (advanced), R (advanced), C++ (intermediate)

EXPERIENCE

University of Washington

RESEARCH ASSISTANT

Seattle, WA

Jun 2018 - Present

- Developed and maintain the **netgsa** R package for network-based gene set analysis, with major improvements in computational efficiency. Computation is up to **40x faster** with no loss in power and was achieved through unsupervised clustering and **RcppEigen** integration. Work involved both methodological development and software implementation, enabling faster and more interpretable network-based analyses.

Analysis Group

SENIOR ANALYST

Boston, MA

Jul 2015 - May 2018

- Worked with clients to conduct statistical analyses of large-scale health insurance claims and EMR data, including development of algorithms to identify treatment intensification in diabetes and characterization of treatment patterns and costs in schizophrenia and HIV. Work involved integrating methods across R, SAS, and SQL in real-world data contexts. Collaborations resulted in 10 publications.
- Member of R development team, designing core statistical tools such as survival analyses and bootstrapped restricted mean survival time (RMST) estimators for matching-adjusted indirect comparisons (MAIC), now widely used across case teams.

INVITED TALKS

Assumption-Learn Inference for Spectral Differential Network Analysis of High-Dimensional Time Series	
• Joint Statistical Meetings (JSM)	2025
• Western North American Region of the International Biometric Society (WNAR)	2025
Spectral Differential Network Analysis for High-Dimensional Time Series	
• Western North American Region of the International Biometric Society (WNAR)	2024
• Joint Conference on Computational and Financial Econometrics and Computational and Methodological Statistics (CFE-CMStatistics)	2024

HONORS & AWARDS

• <i>Best Student Paper Award</i> from the ASA Statistical Learning and Data Science (SLDS) Section	2025
• <i>Best Student Poster Honorable Mention</i> from the ASA Statistical Learning and Data Science (SLDS) Section	2024
• <i>Donovan J. Thompson Award</i> for best combined performance on qualifying exams in UW Biostatistics	2021

TEACHING

University of Washington	Seattle, WA
TEACHING ASSISTANT	Fall 2020, 2021
• Introduction to Biomedical Data Science (BIOST 544)	

SERVICE

- Reviewer for Journal of Machine Learning Research
- Reviewer for Journal of the Royal Statistical Society: Series B
- Reviewer for Journal of the American Statistical Association
